SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	01/19/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

**Office Action Summary**

Application No.

10/700,241

Applicant(s)

SINGHATAT, WAMIS

Examiner

James L. Swiger

Art Unit

3733

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 03 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11/3/2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-14, 19-21 and 27-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Sklar (US Publication 2002/0055780).

Sklar discloses a graft retaining system having an encircling means (20) that at least partially encircles a graft and is positionable relative to an adjacent bone tunnel (10), and where once the graft is inserted, it is capable of going through a tortuous path as the encircling, or "ring," portion can angle with respect to the graft as it is pulled tight yielding a tortuous portion of the graft for the purpose of securing. Note the reference has poor drawings; refer to Pars. 0051 through 0052. Though the encircling means may also be a securing means, the portions 23, are alternatively considered the securing means. Screw 24 may also be a 'securing means' that has a pointed tip, and a fixation tab is 28. As mentioned, the ring may be moved to a second position, as it is operable when engaged with the graft when pulled and is in the 'belt buckle' fashion. The sharpened prong may be the tip of 24. The ring surround the lumen of the cannula (see Fig. 2). Sklar also disclose the at least the steps of providing the encircling means, and positioning the means adjacent the bone tunnel (fig. 8a), and wherein the graft is forced

Art Unit: 3733

into a tortuous path (considered the same as pulling the graft tight as mentioned in the reference for securing the graft within the encircling means.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 16-18, 22-25, and 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sklar in view of Strobel et al. (US Pub 2001/0007074). Sklar disclose the claimed invention except for a securing means comprising an interference screw, that may also be a second member, and an insertion tool and the step of using the tool. Strobel et al. disclose an interference screw (70), and an insertion tool (84) that can move the second member relative to the first and the step of using the tool to insert the screw to secure the device (see pars 0059 through 0064). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Sklar having at least a securing means and an insertion tool in view of Strobel et al. to better use the device and secure the graft to the location desired.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sklar in view of Li et al. (US Patent 6,117,161). Sklar discloses the claimed invention except for a bone engaging portion that specifically extends axially outwardly in one way and a bone fixation portion extending radially outwardly in also an opposing direction. Li et al. disclose a bone fixation portion that extends both ways, relative (see fig. 8) that is better

Art Unit: 3733

for securing (See Col. 2, lines 37-56). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Sklar having at least a bone engaging portion that extends axially outwardly in one way and a bone fixation portion extending radially outwardly in also an opposing direction in view of Lie et al. to better secure the device.

Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Sklar '780 and Strobel et al. '074 as applied to claim 22 above, and further in view of Li et al. The combination of Sklar and Strobel disclose the claimed invention except for a bone engaging portion that specifically extends axially outwardly in one way and a bone fixation portion extending radially outwardly in also an opposing direction. Li et al. disclose a bone fixation portion that extends both ways, relative (see fig. 8) that is better for securing (See Col. 2, lines 37-56). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of the combination of Sklar and Strobel et al. having at least a bone engaging portion that extends axially outwardly in one way and a bone fixation portion extending radially outwardly in also an opposing direction in view of Lie et al. to better secure the device.

Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Sklar and Strobel et al. as applied to claim 30 above, and further in view of Rego, JR et al. (US Patent 5,364,400). The combination of Sklar and Strobel et al. disclose the claimed method except for the step of providing a guidewire and inserting it into the tunnel and interference screw. Rego, Jr. et al. disclose the step of using the

Art Unit: 3733

guidewire in the tunnel that can also be used with respect to the interference screw (See Col. 5, lines 28-41). It would have been obvious to one having ordinary skill in the art at the time the invention was made to perform the method of the combination of Sklar and Strobel et al. having at least the step of providing a guidewire and inserting it into the tunnel and interference screw in view of Rego, Jr. et al. to better secure the graft in the device once it is in place.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L. Swiger whose telephone number is 571-272-5557. The examiner can normally be reached on Monday through Friday, 9:00am to 5:30pm.

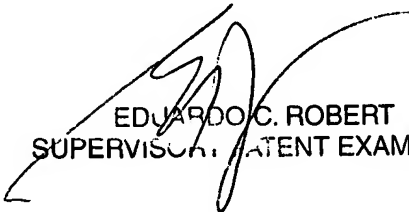

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
